

Job Description - Historic Environment Adviser (PB5)

Job summary

As the largest land manager in the country, Forestry England oversees a vast and diverse network of more than 1,500 forests and woods, spanning over 250,000 hectares. We often celebrate our landscapes for their natural beauty and ecological significance, yet they also harbour some of England's most extraordinary historical sites, monuments, and stories. Beneath the leafy canopies and towering trees lies a rich tapestry of human history, preserved and intertwined with the very roots of the land.

The Historic Environment Adviser will lead our work in championing the historic environment, working with our frontline forestry teams across the South of England, to identify, protect and celebrate historic environment features.

The Historic Environment Adviser will inspire others to support our work in growing the future, championing our Forestry England values. Together we are Forestry England, we grow forests for all, for life.

The postholder will liaise closely and take their professional lead from the national Lead Historic Environment Adviser for Forestry England. They will develop their plans and ideas with the forest planners, beat foresters and their teams, and the area ecologists. Networking with colleagues working on forest resilience across the country, and all parts of the Forestry Commission will be expected.

The postholder will be part of the Environment & Nature Recovery Team in National Operations, managed by the Lead Historic Environment Advisor, but will be based out of our Lyndhurst, Alice Holt Queen Elisabeth Country Park offices, with other options in the district also available.

Key responsibilities & accountabilities

Advocate for the historic environment

- Foster a positive team working relationship between the operational delivery teams, the forest planners and the area ecologists so as to inspire and engage everyone on the historic environment, sharing knowledge, harnessing expertise and building insight and trust. Be open and realistic as to the challenges inherent in the business, promoting transparency and constructive dialogue to achieve positive outcomes.
- Collaborate and build relationships with stakeholders including statutory bodies, NGOs, academic institutions and community groups to support and celebrate the historic environment as an integral part of sustainable forest management. Co ordinating with other team members to ensure consistent messaging and avoiding of duplication of effort.

Forest Planning

- Lead the renewal of Scheduled Ancient Monument plans as part of Forest Plan renewals. Share understanding of the plan and secure the buy-in of the beat forester and their team so that the value and importance of the specific site (or collection of sites) is better understood and thus valued and promoted.
- Support the forest planning team with forest plans renewals incorporating non scheduled heritage features and sharing knowledge and insights with the beat teams who will look after those features.
- Champion the historic environment likely to be associated with ancient woodlands and veteran treescapes to inspire best practice approaches to ancient woodland restoration and veteran trees management. Support training of field staff so they can identify and record potential historic environment features as part of their normal work.
- Commission specific historic environment surveys and research to answer questions pertinent to understanding sites so as to optimise their protection and management in the context of

sustainable forest management.

- Update and maintain the historic environment layer in our GIS systems.

Community engagement and communications

- Liaise closely with the communications and marketing team to champion and promote the work undertaken and direction of travel. Identify and support opportunities to engage with the Festival of Archaeology.
- Where appropriate engage communities and volunteers in the survey, monitoring and evaluation of historic environment sites within our woodlands.

Project Management & Monitoring

- Positively collaborate with finance and business support to maintain clarity on approved expenditure plans and monitoring of spend against delivery.
- Undertake realistic project planning and adherence to existing Forestry England systems and processes to manage project delivery on time and to budget.
- Feed into monitoring and reporting on progress of the Nature Recovery and Biodiversity Programmes in a timely, transparent and accurate manner.
- Feed into national reporting on historic environment measures and progress.

Historic Environment Projects

- Identify, develop and implement historic environment projects consistent with the emerging strategy, ensuring readiness for funding opportunities and supporting both existing and new initiatives.
- Deliver strategic historic environment monitoring and analysis, contributing to evidence-based decision making and natural capital approaches.
- Support the Woodland Creation and Wild Core Historic Environment Advisor with projects both within and outside of the district.

And any other tasks, reasonably requested by your line manager.

Skills, knowledge & experience

Essential professional and technical experience

- Knowledge and experience of working with historic environment features in the landscape
- Proven ability to work positively and collaboratively within multidisciplinary teams.
- A strong track record of successfully researching and writing conservation management plans for scheduled and unscheduled sites with varied community and other stakeholder engagement.
- Experience of commissioning archaeological survey work, including remote sensing techniques, watching briefs and geophysical surveys.
- Strong networking, communication and influencing skills.
- Ability and competence in use of IT packages including MS Office and GIS mapping software.

Qualifications

Essential

- A degree or equivalent in one of: archaeology, historic environment management / conservation, cultural heritage.
- The successful applicant will be a member or able to become a member of the Chartered Institute of Archaeologists, at Associate level or above.

Travel information

The postholder will be expected to travel to different office and depot locations as well as remotely located woods & forests to support the remotely located delivery teams as may be required; and to attend national meetings and training events. This will most likely require travel by car, and thus a current driving licence is seen as a requirement of the role although candidates may put forward a proposal that satisfies the business need to travel without recourse to driving.
